

Accomplish Your Business Goals

Small business owner Lynn Ailsworth is passionate about helping others. She opened her business, Ailsworth Accounting and Software Solutions, in 2007 and to date has helped over 600 clients in Hampton Roads learn how to maintain accurate and up-to-date financial records.

Lynn emphasizes the importance of setting up financial software correctly and offers one-on-one instruction and classes in QuickBooks and Sage 50 (formerly Peachtree). "I provide hands-on training and consulting," she explains. "It can be a lot easier to learn when someone is sitting

right next to you." She customizes her services based on her customers' needs and assists start-ups as well as established businesses.

Besides teaching her clients how to use their accounting software properly and efficiently, Lynn can help you understand accounting and make sure your financial reports are accurate and meaningful.

Her clients appreciate Lynn's non-intimidating teaching style and in-depth knowledge of the software. Clients describe her in glowing terms, such as "a consummate professional," "a gem," and "a godsend." One recommends Lynn for her "patient instruction, guidance, and thoroughness."

Lynn regularly attends conferences and workshops to ensure she stays up-to-date on all the latest developments in her profession. She's also available to speak to area businesses about financial matters. When she isn't pursuing work-related activities, she enjoys spending time with her family and friends, traveling, playing tennis, walking, and scrapbooking.

Whether you are a brand new business or have been in business for several years, Lynn will help you accomplish your goals and help you get more sleep at night! Call her today! *
